

Alisher Akhmedov

AI Engineer • AI Agents & VoIP • Flutter Developer

Summary	AI Engineer at SUMMERTECH LLC, building the zukko.ai platform, where I work at the meeting point of AI agents and telephony. I added IP telephony to the platform with FreeSWITCH and DjangoPBX and connected it to the platform's AI services, so phone calls become data the business can analyze and act on. With LangChain and LangGraph I build tool-using AI agents that analyze calls, score customer conversations against international quality metrics, fill the CRM from call content and guide customers toward a sale in chat. I take features from idea to production: AI backend, integration into the product and deployment. Outside work, I build cross-platform apps and open-source tools with Flutter and Dart, two of them published on pub.dev.		
Experience	Artificial Intelligence Developer 05/2025 – Present SUMMERTECH LLC, Tashkent • Full-time • Product: zukko.ai Built the IP telephony module of the zukko.ai platform on FreeSWITCH and DjangoPBX (SIP, IP PBX), connecting phone calls to the platform's AI agents. Developed the complete AI backend of CallAnalyze, a call analysis service whose AI agents and tools, built with LangChain and LangGraph, analyze customer calls; fully integrated it into the zukko.ai platform. Built an AI agent that independently evaluates customer conversations against international quality metrics. Built an AI agent that learns customer needs from phone calls and enters them into the zukko.ai CRM. Contributed to a chat agent that holds conversations with customers on its own and guides them to the sales stage.		
Projects	dhook Dart • Docker • published on pub.dev Webhook relay CLI that forwards webhooks from GitHub, Stripe, Telegram and other services to a local machine over WebSockets, with API-key auth, rate limiting, Docker Compose and Nginx TLS. FeedDigest Flutter • Riverpod • Gemini Tech news reader that merges Hacker News and dev.to into one feed, with AI summaries in Uzbek, Russian and English via Google Gemini. MVVM, dio, Hive CE; runs on mobile and desktop. FlowCraft Flutter • Riverpod • MCP • macOS / Windows / Linux Local-first whiteboard and diagramming desktop app with a built-in MCP server, so AI coding agents such as Claude Code and Gemini CLI can analyze a repository and draw architecture diagrams on an infinite canvas in real time.		
Skills	• AI Agents & LLMs • AI tool calling • LangChain • LangGraph • Google Gemini API • Git • VoIP • SIP • FreeSWITCH • DjangoPBX • IP PBX • Docker • Nginx • DevOps • Python • Dart • Flutter • Ruby • C++ • Android development • Databases (DBMS)		
Education	Bachelor's degree, Computer Programming 09/2021 – 06/2025 Samarkand State University, Samarkand • GPA: 4.43		
Certificates	EF SET English Certificate 11/2024 47/100 — B1 Intermediate • View certificate
